

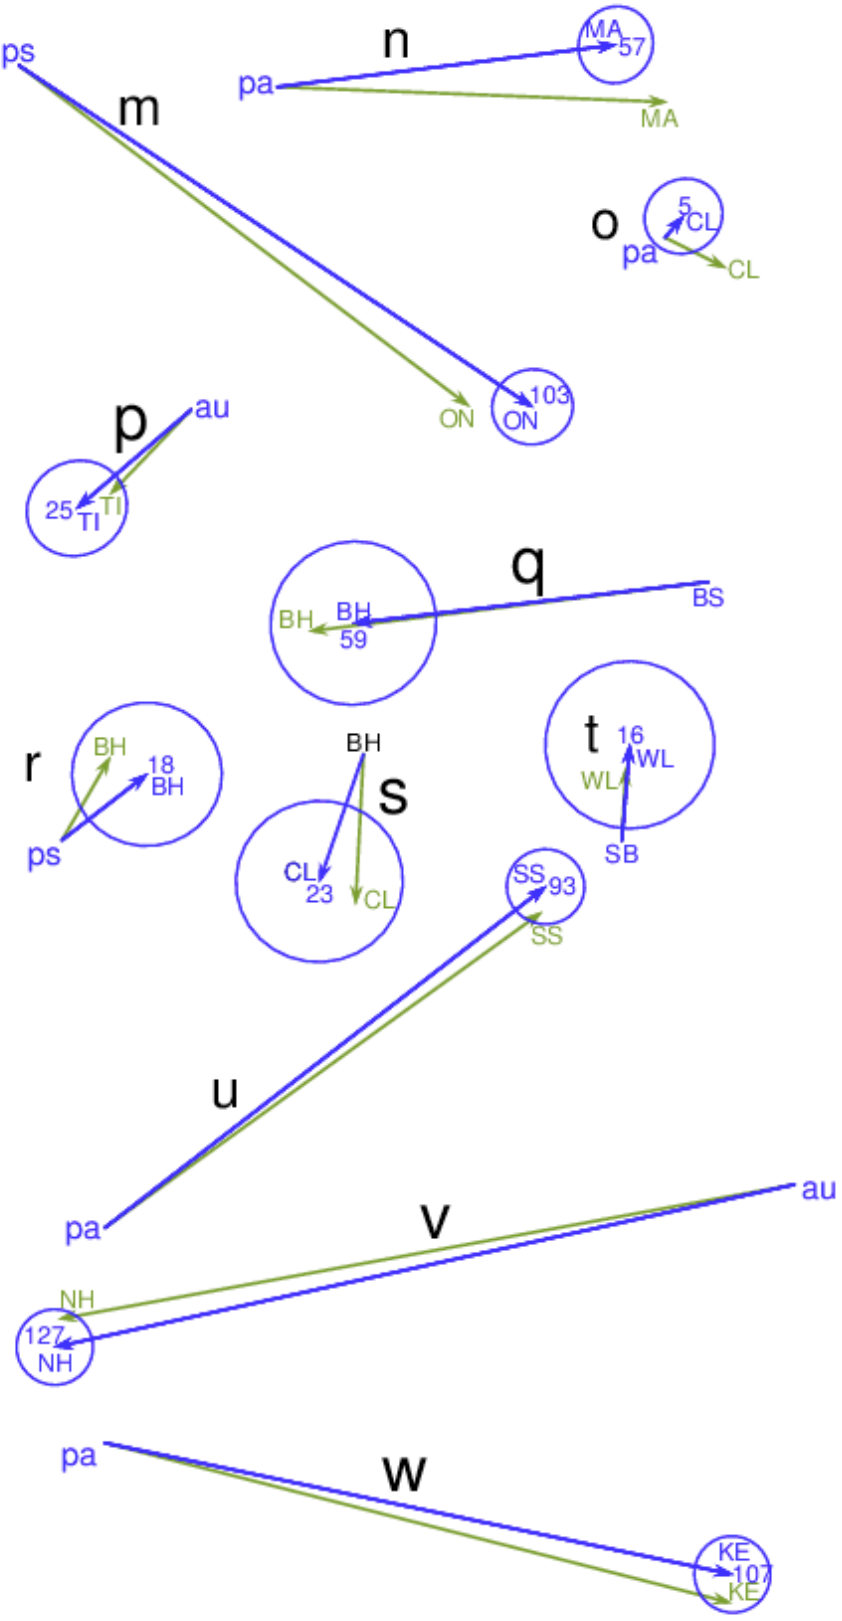

Figure S2. Estimates of horizontal relative plate velocity in NNR–MORVEL56 (black arrows) and 95% confidence limits (blue ellipses) at the locations in the enlargement of the southwest Pacific (Fig. 2) are compared with the estimates of Bird [2003] (green arrows) and, at some locations, with the orientation of the plate boundary (black dashed line segments). Two-letter abbreviations are as in Table 1.
